DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Harry O'Brien Farm is located off Accident - Bittering Road, in a valley that runs down to Bear Creek on the W side of Negro Mountain. The site consists of a house, barn, and several outbuildings.

The house is a two-story, gable-roofed log dwelling with an asymmetrical three-bay facade. The facade points SE, and its first story is covered with a shed-roofed porch. Attached to the NW elevation is a one-story, shed-roofed addition. A shed-roofed porch is attached to the SE elevation of the addition.

The house rests on a cut coursed stone foundation and the walls are built of logs, chinked with straw and lime. Over the logs is placed plain weather boarding attached with cut nails and over this is brown brick-patterned asphalt siding. The windows are two over two sash and have plain board surrounds. The facade door has four panels and is pegged together. The door originally had a four-paned transom which has been removed. The door has a box lock.

The roof is covered with corrugated metal and has a box cornice which returns on the gable ends. The main block was one exterior brick stove chimney on the NE gable end. The facade porch roof is supported by wooden posts.

The addition on the NW elevation of the main block rests on a concrete block foundation; the walls appear to be frame and are covered with brown brick-patterned asphalt siding. The roof is covered with corrugated metal. The addition has one brick interior stove chimney at its NW gable end. The shed roof of the porch on the SW elevation is supported by wrought iron posts.

The first floor of the log portion has two rooms and a central staircase. The walls have been covered with modern paneling but the original pegged four-paneled doors, with box locks, are in place. The plan of the second floor is unknown. The addition is divided into two rooms. A second staircase runs up the original outside NW wall of the main block. The original weatherboarding is revealed at one side of this staircase. To the S of the house is a wooden frame garage and to the N are two small outbuildings.

Northeast of the house is a large double-pen log bank barn, with a forebay. The bank entrance faces SW. The barn rests on a rough stone foundation and the walls, which expand the size of the barn beyond its original saddle-notched log walls, are covered with vertical boards. Under the forebay on the NE elevation the log walls are still visible. Stall doors on this wall retain their original wrought iron hinges. The fore bay is supported by a single modern cinderblock post at its N corner. Inside the barn the log walls rise two levels from the level under the forebay. Partitions are also log. The barn's gable roof is covered with corrugated metal. The barn houses cattle and stores hay.

To the S and E of the barn are several frame outbuildings, including a chicken house and several storage sheds.

STATEMENT OF SIGNIFICANCE

The Harry O'Brien farm is significant architecturally for its log dwelling and log barn. The farm makes up a small district of log structures (See G-III-B-105, 107, and 112) in this area, all perhaps built around the same time. The log barn on this property is reputed to be the oldest log barn still in use in Garrett County. It is certainly true that log barns are no longer common in this area, and that this barn is probably representative of a disappearing type.

Much of the land which makes up this farm was sold into the Fratz family during the 19th century, leading one to suppose that Fratzen constructed the house and barn probably in the mid-19th century. The current owner purchased the property in 1937.
